Antwerpen 2060, BE

Recent graduate in Applied Computer Science – Application Development. I enjoy working on both the front-end and back-end of applications, building practical and well-designed solutions, and continuously improving my skills through collaboration and learning.

Work Experience

Internship

Mar 2025 - Jun 2025

Apvine | Kontich

- Contributed to the development of an advanced password manager using Mendix, a low-code development platform.
- The application integrated with Microsoft Azure Key Vault for secure password storage and included features like role-based access control and a browser extension for autofill functionality.

Projects

Poker Game

Nov 2024 - Jan 2025

- Developed an online Poker game as a college project with a team of five using Spring Boot, React, and Keycloak, implementing backend logic, real-time updates, and secure authentication.
- Improved Java and TypeScript skills while gaining hands-on experience in teamwork, feature planning, and code reviews.

Skills

Hard Skills: Java, Javascript, .Net, HTML, CSS, React, SQL, Kotlin, Mendix, Typescript, C#, Angular, Spring Boot, Azure Key Vault
